

SHARON ARAYA RAMIREZ

Information Systems Engineering

PROFILE

I am an Information Systems Engineering student with a strong commitment to personal and professional growth. I have experience in web and backend development, working with technologies such as React, Spring Boot, Laravel, and MySQL. I am passionate about learning new technologies and collaborating in environments that encourage innovation and continuous improvement. I have a particular interest in cybersecurity, artificial intelligence, and databases, and I am eager to continue developing my skills and expertise in these areas.
